Report Explanation

For 30 years, DKT has collected sales data from contraceptive social marketing programs around the globe to publish the **Contraceptive Social Marketing (CSM) Statistics report**. The sales are primarily made to the private sector, consisting of clinics, supermarkets, mini-markets and a myriad of other kinds of shops. However, some programs also sell products to other non-governmental organizations (NGOs) and the public sector; in such instances, sales have been called out and CYPs have been discounted. Programs that generate fewer than 10,000 CYPs in a given year have either been omitted or, if relevant, combined with other programs; these are noted where applicable. Clinical service provision data or social franchise results are not included in this data. For some DKT programs, CYP totals may be adjusted due to variations in CYP conversion factors for MVA and misoprostol product sales. Additionally, the data from Population Services International (PSI) derives from sales in a select group of countries in PSI's 'Social Business Unit', which are delivered by almost fully financially self-reliant entities. It should be noted that these are not representative of all PSI's social marketing activities. Data from PSI's other social marketing activities was not made available. Lastly, some programs were not able to be included in the report, despite repeated attempts throughout the data collection process, so this report does not encompass all social marketing activity. If you would like to be included in future reporting, please contact info@dktinternational.org.

How We Calculate CYPs

A CYP, which stands for "**Couple Years of Protection,**" is a common family planning metric and represents the amount of contraception one couple needs to prevent pregnancy over a 1-year period. To calculate CYPs, we rely on sales data by assigning contraceptive products different CYP conversion factors based on the expected amount of time the product can be used before replacement. Therefore, we multiply or divide the number of units of each product sold by their respective converter to estimate CYPs. The following conversion factors, which are slightly different from CYP factors used by other agencies, are used across this report. Sales made to governments and NGOs are heavily discounted. Sales data for DKT International programs is available online at www.dktinternational.org for use by researchers and other parties.

<u>Method</u>	<u>Conversion Factor</u>	<u>Method</u>	<u>Conversion Factor</u>
Condom	÷100	4-year Implant	x3.2
Free Condom	÷200	5-year Implant	x3.8
Female Condom	÷100	IUDs	x4.4
Free Female Condom	÷200	MA* combipack	x1.7
Pill cycles	÷14	MVA kits	x25
3-month Injection	÷4	Misoprostol	÷12
2-month Injection	÷6	Mifepristone	÷.67
1-month Injection	÷12	Vaginal Foaming Tablets	÷120
Emergency Contraception	÷16	Vaginal Contraceptive Film	÷120
3-year Implant	x2.5		

SOCIAL MARKETING STATISTICS 2021

Highlights
